Coaching 360

Business Requirements Document

Document Attribute	Value
Prepared For	Mariner Finance - Central Operations, Branch Operations, HR, Compliance, IT, and Vendor Development Teams
Executive Sponsor	Dean Cooper
Executive Stakeholders	Jason Kohler, Julia Timofeyeva, Josh Johnson
Product Name	Coaching 360
Document Purpose	Define the business requirements, MVP scope, business capabilities, functional requirements, reporting needs, data/integration needs, and governance requirements required to solicit, estimate, design, and build Coaching 360.
Document Status	Draft for stakeholder review and vendor evaluation
Prepared Date	May 29, 2026

Version History

Version	Date	Author	Description
1.0	May 29, 2026	Daniel Glowack	Initial BRD compiled from baseline BRD, meeting minutes, requirements sessions, prototype functionality, and stakeholder discovery.
1.1	June 2, 2026	Daniel Glowack	Pending stakeholder review, requirements reviewed and refined for business, functional and non-functional requirements. First draft of appendices included.
2.0	August 4th, 2026	Kim Torterotot	Moved automated Dayforce My Success Plan PDF storage, Salesforce notification integration, enterprise data warehouse replacement integration, and AI branch planning out of Phase 1. Removed Duo SSO as a named security requirement; retained corporate SSO or approved identity provider wording.
2.1	August 5, 2026	Codex-assisted cleanup	Corrected Phase 1 versus Phase 2 scope language for automated Dayforce storage, Salesforce notifications, AI branch planning, enterprise data warehouse integration, and SSO wording. Highlighted cells identify changed content.
2.2	August 21, 2026	Kim Torterotot	Updated requirements from the August 12, August 17, and August 18 AVP pilot reviews. Added confirmed KPI, My Success Plan, Branch Visit, Accountability Meeting, task, notification, reporting, security/visibility, and Outlook requirements. Added unresolved stakeholder decisions and UAT/operational readiness questions from the August 21 action-required email. New and changed content is highlighted in yellow.

2.3	August 27, 2026	Kim Torterotot	Updated the BRD to align with current JIRA requirement changes through August 27, including Success Plan required-field/removal changes, Branch Visit action-plan optionality and monthly planning behavior, task/action-item terminology and date rules, seven-day upcoming task view, seven-day My Success Plan exception visibility, and Relief Manager authority remaining unresolved. Existing Version 2.2 highlighting is retained; Version 2.3 changes are highlighted in yellow. Renamed the Coaching 360 development-plan feature throughout the BRD to My Success Plan, replacing Individual Development Plan (IDP), IDP, and Coaching Plan terminology where those terms referred to the Coaching 360 feature. Updated related reporting terminology to My Success Plan Completion. Preserved requirement identifiers such as FR-IDP for traceability. Added a consolidated Removed/Changed Requirements log for Version 2.3. For terminology replacements, only the new My Success Plan wording is highlighted in yellow; other Version 2.3 requirement changes and prior yellow highlighting are retained.

1. Business Context and Current State

1.1 Current State Overview

The current development plan interactions depend on a combination of RPA-generated spreadsheets, Power BI or reporting views, email communication, local documents, manually maintained logs and ad hoc coaching notes. Users must move between tools to review performance, document goals, track coaching, communicate feedback, and support audit requests.

The baseline project began as Performance Management 360 with the goal of modernizing how performance management data is captured, tracked, and reported. That baseline has expanded into Coaching 360, a standalone platform that must retain existing KPI reporting functionality while adding structured coaching, development planning, branch visits, accountability meetings, notifications, reporting, and audit governance.

1.2 Current State Pain Points

Pain Point	Business Impact	Required Future-State Response
Spreadsheet and RPA dependency	Manual generation and extraction processes create operational fragility, time delays, and scalability concerns.	Replace spreadsheet/RPA workflow with a direct web application and database-backed workflows.
Fragmented coaching records	Coaching notes, feedback, and development conversations are not consistently stored, searchable, or auditable.	Create structured coaching records, searchable history, employee acknowledgements (where applicable), and immutable record governance.
Limited two-way interaction	Employees cannot consistently acknowledge, comment, or participate in a shared coaching/development workspace.	Provide employee acknowledgement, threaded comments, task list visibility, and My Success Plan goal entry.
Inconsistent branch visit documentation	Branch visits occur without a standardized plan, record, takeaways structure, or follow-up accountability mechanism.	Create a Branch Visit Governance module with planning, documentation, task assignment, after-action review, and archive.
Manual accountability tracking	Weekly accountability meetings are maintained in spreadsheets or documents that are overwritten, inconsistent, or not reportable.	Create structured weekly accountability records with multiple participants, goals, commitments, and history.
Audit burden	HR/Compliance reviews require manual collection of My Success Plans, coaching notes, and documentation samples.	Provide random sampling, search, export, retention, audit logs, and role-based audit access.
Limited management insight	Leadership lacks consolidated visibility into adoption, coaching activity, My Success Plan completion, overdue tasks, branch visits, and accountability activity.	Provide executive, HR, and Compliance analytics around usage, activity, completion, and exceptions.
Disconnected performance and development process	KPI data exists separately from coaching and development workflows.	Connect KPI drill-down to scorecards, coaching records, My Success Plans, branch visits, and accountability actions.

1.3 Business Drivers

- Scalability: The organization requires a solution capable of supporting 2,000-2,500 users across field and central operations.
- Process efficiency: The current process relies on spreadsheets, email, manual updates, and RPA scripts that do not represent a sustainable operating model.
- Data integrity: Direct application/database integration reduces duplicate handling, extraction risk, and inconsistent records.
- Transparency and accountability: Employees and leaders need a shared, traceable view of coaching, development goals, follow-up actions, and acknowledgements.
- Employee development: Linking coaching, KPI performance, competencies, and My Success Plans supports continuous improvement and skill development.
- Operational governance: Branch visits and accountability meetings require consistent structure, follow-up, and reporting.
- Audit readiness: HR and Compliance need easy access to retained records, sampling tools, and exportable evidence.
- Future integration foundation: The platform must support Phase 1 corporate SSO or an approved identity provider, Outlook/email notification delivery, governed PDF exports, and extension points for Phase 2 Dayforce, Salesforce, data warehouse, and AI capabilities.

2. Business Objectives and Success Measures

2.1 SMART Business Objectives

Objective ID	SMART Objective	Primary KPI / Success Measure	Owner
OBJ-001	Replace spreadsheet/RPA-dependent performance management workflows with a web-based application for KPI review, coaching, My Success Plan, branch visit, and accountability activity for MVP users.	Reduction in manual spreadsheet/RPA usage; successful MVP adoption by pilot and production users.	Product Owner / IT / Operations
OBJ-002	Provide managers and employees with a single interface for scorecard review, coaching records, My Success Plan goals, acknowledgements, comments, and follow-up tasks.	User adoption; active users; coaching records created; employee acknowledgements completed.	Operations Leadership
OBJ-003	Standardize monthly My Success Plan creation, review, approval, archive, and app-generated PDF export with manual Dayforce handling in Phase 1; automate Dayforce storage/transmission in Phase 2.	Monthly My Success Plan completion rate; My Success Plan approval completion rate; app PDF generation/export success rate; Phase 2 Dayforce automation success rate when approved.	Managers / HR
OBJ-004	Standardize branch visit documentation and after-action review while preserving leader flexibility in visit cadence.	Branch visits documented; after-action reviews completed; follow-up actions created/completed.	Branch Operations Leadership

OBJ-005	Create structured weekly accountability meeting records with historical continuity.	Weekly records created; participant records completed; overdue commitments reduced.	Leadership / Managers
OBJ-006	Enable HR and Compliance audit sampling across coaching, My Success Plans, branch visits, and accountability meetings.	Sampling completed; audit turnaround time; exception rates.	HR / Compliance
OBJ-007	Provide executive-level reporting for adoption, usage, coaching activity, My Success Plan completion, branch visit activity, accountability activity, and overdue tasks.	Executive dashboard/report availability; usage reporting accuracy.	Executive Sponsors
OBJ-008	Prepare for future AI-assisted branch visit planning and the broader AI roadmap without compromising auditability or human judgment.	Phase 2 AI planning design readiness; user acceptance when enabled; override tracking.	Operations / IT / Vendor
OBJ-009	Increase employee visibility into coaching history, development goals, and performance progress.	Employee acknowledgement rate, employee login frequency, My Success Plan progress updates, and employee satisfaction with development visibility	Operations

2.2 MVP Success Criteria

Success Area	Minimum Acceptance Condition
KPI continuity	Existing KPI tool capabilities are replicated at district, branch, and employee levels without changing approved formulas or metric definitions.
Coaching record capture	Authorized management users can create immutable coaching records with attachments, follow-ups, employee acknowledgement, and searchable history.
My Success Plan process	Employees can create monthly goals; managers can review/modify; approved My Success Plans become non-editable historical records and generate app PDFs for manual Dayforce handling. Automated Dayforce storage/transmission is Phase 2.
Branch visits	Authorized users can plan, document, finalize, export, archive, and report branch visits, including discussion topics, takeaways, action plans, and assigned owners.
Accountability meetings	Weekly accountability records support multiple participants, focus metrics, mini goals, discussion notes, plans, previous commitments, and status updates.
Security	Users only see records permitted by hierarchy or special access role. Branch managers cannot see records for employees outside their branch.
Audit	HR/Compliance can sample and review coaching records, My Success Plans, branch visits, and accountability meetings.
Notifications	Tasks and required actions generate in-app and Outlook/email notifications in Phase 1. Salesforce notification events are Phase 2 if approved by enterprise architecture.
Performance	Common screens load within target performance thresholds under expected user volume.

3. Scope Definition and MVP Boundaries

3.1 In Scope

Scope Category	In-Scope Requirements
Application	Standalone Coaching 360 web application with role-based navigation and responsive user interface.
KPI Module	Replicate existing KPI tool capabilities including district, branch, and employee drill-down; historical 12-month view; ranking history; scorecards; trend reporting; review exclusion; and PDF export.
Coaching Module	Create, save, view, search, export, and retain immutable coaching records; support attachments, tags/categories, employee acknowledgement, comments, follow-up tasks, and internal collaboration.
My Success Plan Module	Monthly development planning with employee-entered goals, manager review/modification, KPI goals, competency goals, strengths, opportunities, action plans, success measures, Approved status, archive, and app-generated PDF export/manual Dayforce handling. Automated Dayforce storage is Phase 2.
Coaching Repository	Search/filter coaching interactions by employee, manager, branch, date, KPI, competency, status, tag, keyword, and other relevant criteria.
Branch Visit Governance	Plan, document, finalize, export, archive, and report branch visits with discussion topics, takeaways, action plans, assigned ownership, tasks, and after-action review.
Branch Visit Planning	Manual and rules-based branch visit planning using branch snapshot, staffing, KPI context, previous visits, and user-entered topics. AI-generated branch, employee, topic, and follow-up recommendations are Phase 2.
Accountability Meetings	Weekly structured meeting records with multiple participants, discussion notes, focus metrics, mini goals, plans of action, previous commitments, status updates, historical review, and export.
Tasks and Notifications	Parent-linked tasks from coaching, branch visits, and accountability meetings; in-app and Outlook/email notifications for Phase 1. Salesforce notification delivery is Phase 2.
Audit and Reporting	HR/Compliance sampling, executive adoption reporting, usage reporting, completion metrics, overdue actions, exports, and retention controls.
Integrations	Active Directory/hierarchy data, approved KPI/reporting sources, Outlook/email delivery, app-generated PDF exports, and manual Dayforce handling for Phase 1. Salesforce notification delivery, automated Dayforce storage, enterprise data warehouse replacement integration, and AI integration are Phase 2.

3.2 Out of Scope for MVP

Out-of-Scope Item	Rationale / Future Handling
Annual performance reviews	Annual reviews remain in Dayforce and are not part of Coaching 360 MVP.
Replacement of Dayforce as HR system	Dayforce remains the system for HR performance reviews and document storage; Coaching 360 stores operational coaching/development records and sends/exports PDFs where required.
AI-generated coaching narratives	Future phase only; coaching content remains human-created in MVP.
AI-generated learning recommendations	Future phase, dependent on indexed learning/resource library.
Full Mariner University content integration	Future phase unless a limited resource link/index is explicitly scoped by vendor.

BOR/Branch Operations Review replacement	Not MVP. Branch visit governance may inform future BOR evolution, but the MVP must not be positioned as a BOR replacement.
Vendor-prescribed KPI calculation changes	KPI formulas and definitions remain governed outside Coaching 360.
Native mobile application	No native mobile app is required. Responsive web access may be supported but mobile app delivery is not in scope.

3.3 MVP Definition Statement

The Coaching 360 MVP is the replacement of the existing KPI Tool .NET application plus the creation of a unified coaching, development planning, branch visit governance, accountability meeting, task, notification, audit, and reporting platform for Branch Operations and Central Operations.

3.4 Roadmap View

Phase	Capabilities
MVP / Phase 1	KPI module, coaching records, My Success Plans, coaching repository, branch visits with manual/rules-based planning, accountability meetings, task management, in-app/Outlook/email notifications, reporting, audit sampling, app-generated PDF exports, and manual Dayforce handling where required.
Phase 2	Enhanced Salesforce notification integration, automated Dayforce My Success Plan PDF storage/transmission, enterprise data warehouse replacement integration, AI branch planning, learning-resource links, branch visit action plan “library of solutions”, and other approved future integrations.
Phase 3+	AI-generated coaching insights, learning recommendation engine, AI-based operational risk detection, potential BOR integration, potential 1:1 interaction documentation

4. Stakeholders, Users, and Personas

4.1 Executive and Business Stakeholders

Stakeholder / Group	Role in Project	Primary Interest
Dean Cooper	Executive Sponsor	Strategic direction, project authorization, business outcomes, branch visit governance, adoption.
Jason Kohler	Executive Stakeholder	Branch operations alignment, leadership operating model, branch visit governance, adoption.
Julia Timofeyeva	Executive Stakeholder	Leadership alignment, accountability model, operations governance.
Josh Johnson	Executive Stakeholder	Enterprise support, project permission, organizational alignment.
Central Operations	Business Owner / User Group	KPI tracking, coaching, My Success Plans, accountability processes, operational consistency.
Branch Operations	Primary User Group	Scorecards, coaching, My Success Plans, branch visits, accountability calls, leadership reporting.
Human Resources	Governance / Audit / Competency Owner	Competency model, audit sampling, record review, retention, employee development governance.
Compliance	Governance / Audit	Access to records, sampling, compliance-related coaching visibility, audit support.

Quality Assurance	Governance / Triggering / Audit	Quality-related notifications, review support, manager coaching inputs.
IT / Security / Data Teams	Delivery / Architecture / Integration	SSO, security, hosting, data warehouse, integration, performance, supportability.
Vendor / Development Team	Implementation Partner	Requirements estimation, technical design, build, testing, support, handoff.

4.2 User Population

User Group	Estimated Population	Notes
Employees / Individual Contributors	Approx. 2,000-2,500 total users	Includes field and central operations users.
Branch Managers	Approx. 500	Primary coaching creators for branch employees; view branch employee records.
AVPs	TBD	Primary branch visit users in the field; create coaching and accountability records.
VPs / SVPs	TBD	Leadership oversight, branch visit, accountability, coaching visibility by hierarchy.
Central Operations Managers / Directors / PMs	TBD	Central operations management roles vary; grouped into central senior management, management, and general employees.
HR / Compliance	TBD	Special access groups requiring permissions independent of direct reporting hierarchy.
Executives	TBD	Executive reporting and broad visibility based on approved access model.

4.3 Role Based Permissions

Role	Primary Needs	Key Permissions / Interactions	Restrictions
Production Employee	View scorecards, coaching records, My Success Plans, and tasks.	View own records; acknowledge coaching; comment on threads; edit My Success Plan before approval; complete tasks.	No coaching, branch visit, accountability, or KPI access. Cannot view others' records.
Branch Operations Manager	Manage employee performance and development.	View hierarchy scorecards; create coaching records; manage My Success Plans; create tasks, follow-ups, and accountability meetings; access KPI module.	Limited to authorized hierarchy. No branch visit creation.
Branch Operations Senior Management (AVP/VP/SVP)	Oversee branch performance and activity.	Access KPI module; create coaching, branch visit, and accountability records; assign actions; view subordinate records.	Limited to authorized hierarchy.
Central Operations Manager	Manage employee performance and development.	View hierarchy scorecards; create coaching records; manage My Success Plans; create tasks and follow-ups; access KPI module.	No branch visit or accountability meeting creation. Limited to authorized hierarchy.

Central Operations Senior Management	Oversee central operations performance and activity.	Access KPI module; create coaching records; assign actions; view subordinate records.	No branch visit or accountability meeting creation. Limited to authorized hierarchy.
Executive Leadership / HR / System Administrator	Enterprise oversight, governance, and auditing.	Enterprise-wide visibility; KPI access; audit and reporting access; coaching access where authorized.	No branch visit or accountability meeting creation.
Read-Only	Review organizational data and activity.	View all authorized modules, records, dashboards, and reports.	No create, edit, delete, acknowledge, comment, assign, or approval permissions.

5. Business Capability Model

5.1 KPI Visibility

Provide district, branch, and employee performance visibility using approved KPI outputs without changing existing KPI definitions or calculations.

- Hierarchy navigation from division/region/district to branch and employee level.
- Individual scorecards displaying MTD, current goal, difference, department goal, ranking, and trends.
- Rolling 12-month and 90-day views, including the ability to exclude months from review when viewing the employee level.
- Ranking history and current scorecard views aligned to existing KPI process.
- KPI scorecard PDF export.
- Connection from KPI view to scorecard, My Success Plan, and coaching records.

5.2 Coaching Management

Create standardized, immutable coaching records that support management documentation, employee visibility, follow-up accountability, and audit readiness.

- Management-level users create coaching records for employees within permitted hierarchy.
- Employees (may) acknowledge records and participate in discussion threads but cannot create coaching records.
- Coaching records capture focus area, trigger, KPI, competency, severity, observation, coaching provided, action required, owner, due date, follow-up, visibility, acknowledgment requirement, tags, and attachments.
- Records become immutable upon submission; comments, acknowledgements, and task updates may occur after submission without changing original content.
- Internal collaboration/notes are separated from employee-visible conversation where required.

5.3 My Success Planning

Support monthly employee development planning tied to KPI and competency focus areas, strengths, opportunities, action plans, and success measures.

- Employees create monthly goals during the first week of the month.
- Managers review, modify if necessary, and approve the monthly My Success Plan.

- My Success Plans include KPI development goals, competency development goals, strengths, opportunities, action plans, and what success looks like.
- Approved My Success Plans become historical, non-editable records and generate app-produced PDF copies for download and manual Dayforce attachment; automated Dayforce storage/transmission is Phase 2.
- Competency behaviors must be based on the employee role/stage from the formal HR competency model.

5.4 Coaching Interaction Repository

Provide a searchable, auditable historical repository for coaching and related activity.

- Search/filter by employee, manager, branch, region, district, date, KPI, competency, coaching type, discussion topic, tag, keyword, and status.
- View record details, attachments, visibility, employee acknowledgement, internal collaboration, follow-up status, and audit activity.
- Export coaching records as app-generated PDFs for manual Dayforce attachment or evidence handling where required.

5.5 Branch Visit Governance

Provide a standalone module for planning, documenting, finalizing, exporting, archiving, and reviewing branch visits.

- Users select branch, review branch snapshot, document visit date, discussion topics, takeaways, and action plans.
- Frequency is not system-enforced; AVPs, VPs, and SVPs determine visit cadence based on business needs and role requirements.
- Every visit must include required discussion topics and takeaways/discussion notes. Action plans or action items are optional and are used when follow-up/action is needed.
- Users can assign follow-up tasks to allowed owners within appropriate hierarchy.
- After-action reviews support PDF export, post-visit metric comparison, and historical archive.
- Upon save of visit, a copy of the after-action review is issued to the management chain, VP, AVP and BM.

5.6 Accountability Meeting Governance

Support weekly structured accountability meetings across management levels and teams.

- Weekly cadence, flexible participant structure, and one meeting record containing multiple participants.
- Each participant supports discussion notes, focus metrics, current monthly goals, mini goals for the week, plans of action, previous commitments, and status updates.
- Records are historical and searchable; leaders can drill down into accountability records within their hierarchy.
- Accountability meetings support tasks, exports, notifications, and reporting.

5.7 Task and Notification Management

Create a controlled task object tied only to parent records and notify users of required actions.

- Tasks originate only from coaching records, branch visits, and accountability meetings. User-facing terminology uses Tasks or Action Items rather than Follow-Up unless an approved exception applies.

- Tasks maintain parent record, owner, Created Date, Due Date, status, completion date, comments, and audit history. Normal task creation does not use a separate Follow-Up Date.
- Notifications are delivered in application and by Outlook/email for Phase 1; Salesforce notification delivery is Phase 2 if approved by enterprise architecture.
- Notifications support need for acknowledgements, overdue tasks, follow-ups, My Success Plan actions, branch visit actions, accountability actions, and recognition prompts.

5.8 Audit, Compliance, and Analytics

Enable monitoring, audit sampling, retention, adoption reporting, and leadership analytics.

- HR can randomly sample coaching records, My Success Plans, branch visits, and accountability meetings.
- Executive/HR/Compliance users can access adoption, activity, completion, overdue, and usage analytics.
- All records maintain timestamps, creator, updater (where applicable), visibility state, parent-child relationships, and retention controls.
- Records are retained for at least seven years unless longer retention is required.

5.9 AI-Assisted Branch Visit Planning

Phase 1 provides manual and rules-based branch visit planning context while preserving human discretion. AI-assisted branch prioritization, employee recommendations, discussion topics, and follow-up actions are Phase 2.

- Recommend branches to visit using KPI trends, performance patterns, vacancies and last visit date.
- Recommend employees requiring coaching where data indicates material performance concerns or coaching opportunities.
- Recommend branch-level discussion topics and suggested follow-up actions.
- Allow users to accept, modify, or add custom discussion topics and action plans.
- Future AI coaching and learning recommendations remain outside MVP unless separately approved.

6. Business Requirements

ID	Business Requirement	Priority	Primary Owner
BR-001	Coaching 360 shall be implemented as a standalone internal product serving both Branch Operations and Central Operations.	Must	Executive / Operations
BR-002	The platform shall support enterprise-wide deployment for approximately 2,000-2,500 users.	Must	Executive / IT
BR-003	The platform shall preserve existing KPI functionality, formulas, metric relationships, ranking logic, and historical views.	Must	Operations / MIS
BR-004	Official KPI definitions and calculations shall remain externally governed by Business Applications & Reporting, MIS, enterprise data teams, Central Operations, and Branch Operations.	Must	Data Owners
BR-005	Coaching records shall become immutable after submission.	Must	HR / Compliance
BR-006	Employees shall not create coaching records but may acknowledge records, add employee-visible comments, complete tasks, and create monthly My Success Plan goals.	Must	Operations / HR

BR-007	Management-level users and above shall be able to create coaching records within their organizational hierarchy.	Must	Operations
BR-008	Employees shall create My Success Plan goals during the first seven calendar days of each month as the expected operating rhythm; access shall not be restricted after seven days. Managers review the employee-owned plan and either approve it or return it for refinement.	Must	Operations / HR
BR-009	Approved monthly My Success Plans shall be historical, non-editable records and shall support app-generated PDF export for manual Dayforce attachment. Automated Dayforce storage/transmission is Phase 2.	Must	HR / IT
BR-010	Branch Visits shall be a standalone module, not merely a coaching record type.	Must	Branch Operations
BR-011	Branch visit cadence shall not be system-enforced; leaders determine visit schedules based on business need.	Must	Branch Operations
BR-012	Every branch visit record shall include required discussion topics and takeaways/discussion notes. Action plans or assigned action items are optional and are used when an observation or discussion requires follow-up/action.	Must	Branch Operations
BR-013	Accountability meetings shall be weekly structured records capable of containing multiple participants and participant notes.	Must	Operations Leadership
BR-014	Tasks shall not exist independently; every task shall originate from a coaching record, branch visit, or accountability meeting.	Must	Audit / Operations
BR-015	Notifications shall be supported in-app and through Outlook/email for Phase 1. Salesforce notification events are Phase 2 where approved by enterprise architecture.	Must	Operations / IT
BR-016	The platform shall retain coaching, performance, development, branch visit, accountability, task, attachment, and audit records for a minimum of seven years unless longer retention is required.	Must	HR / Compliance
BR-017	HR shall be able to have the system randomly sample and review coaching records, My Success Plans, branch visits, and accountability meetings.	Must	HR
BR-018	Compliance shall receive approved special access to all product features & data independent of direct reporting hierarchy.	Must	Compliance
BR-019	Executive, HR, and Compliance users shall be able to view adoption and usage analytics for Coaching 360.	Must	Executive / HR
BR-020	AI branch visit planning shall be designed as a Phase 2 capability to recommend branches, employees, discussion topics, and follow-up actions when technically feasible and accepted by stakeholders.	Future	Operations / Vendor
BR-021	The system shall support PDF export for coaching records, My Success Plans, branch visits, accountability meetings, and KPI scorecards.	Must	Operations / HR
BR-023	The platform shall support special role models for field senior management, field management, field employees, central senior management, central management, central employees, HR, Compliance, and administrators.	Must	Security / IT
BR-024	The vendor shall propose application architecture, hosting, database, security, integration, scalability, support, source code, and licensing approach.	Must	IT / Procurement

BR-025	Monthly My Success Plans shall remain employee-owned and self-directed; managers shall review and either approve the plan or return it for refinement.	Must	Operations / HR
BR-026	My Success Plans shall support multiple Metric Focus Area and Competency Focus Area selections within one plan per employee.	Must	Operations / HR
BR-027	The final non-editable My Success Plan status shall be Approved rather than Locked; comments may continue after approval.	Must	Operations / HR
BR-028	My Success Plan reporting/review shall support date-range selection.	Must	Operations / Reporting
BR-029	Relief Manager My Success Plan authority is not Branch Manager-equivalent. When there is no Branch Manager, the AVP handles My Success Plan review and approval. Any remaining system-role mapping details remain subject to Security/IT confirmation.	Must	Operations / IT
BR-030	Finalized Accountability Meeting records shall become read-only.	Must	Operations Leadership
BR-031	Branch Visit functionality shall support pre-visit planning followed by post-visit action plans and follow-up items.	Must	Branch Operations
BR-032	Confidential Branch Visits shall prevent Branch Manager visibility of the planned visit until the visit is completed.	Must	Branch Operations
BR-033	Completed Branch Visit records shall be read-only while open follow-up tasks may continue to be updated.	Must	Branch Operations
BR-034	The current Branch Visit Archived status shall be replaced with Completed; true archival requirements remain open.	Must	Branch Operations / HR / Compliance
BR-035	Success Plans shall remove Current Actual, KPI Source, and Goal Statement from plan entry/display and shall require all remaining applicable Success Plan fields.	Must	Operations / HR
BR-036	User-facing task functionality shall use Tasks or Action Items rather than Follow-Up terminology unless an approved exception applies. Tasks shall use Created Date and Due Date; normal task creation shall not require a separate Follow-Up Date.	Must	Operations / IT
BR-037	Branch Visit planning shall provide a month-based planning view with date/branch placeholders that can be opened to begin the Branch Visit planning process.	Must	Branch Operations

7. Functional Requirements Matrix

The following requirements are written for vendor-estimation. They intentionally avoid excessive field-level implementation detail while still defining the required business capabilities, records, workflows, and controls.

ID	Area	Functional Requirement	Priority	Acceptance Criteria
FR-KPI-001	KPI Visibility	Provide hierarchy filtering from division/region/district to branch and employee level.	Must	Requirement is demonstrable in MVP with role-appropriate test data.

FR-KPI-002	KPI Visibility	Display KPI scorecards at branch and employee levels using approved enterprise data.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-KPI-003	KPI Visibility	Preserve existing KPI formulas, ranking logic, scorecard structures, and metric relationships.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-KPI-004	KPI Visibility	Display MTD value, current goal, difference, department/branch goal, ranking, and trend context where applicable.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-KPI-005	KPI Visibility	Support rolling 12-month historical view and 90-day average views.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-KPI-006	KPI Visibility	Allow authorized users to exclude specific months from review with required notes and visible exclusion indicator.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-KPI-007	KPI Visibility	Provide employee ranking history and current ranking placement on employee scorecards.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-KPI-008	KPI Visibility	Provide current month and prior-period trend comparisons on the branch after action reviews.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-KPI-010	KPI Visibility	Allow navigation from KPI dashboard to individual scorecard, My Success Plan, and coaching record creation.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-KPI-011	KPI Visibility	Consume KPI data from approved reporting tables or sources in Phase 1; support enterprise data warehouse replacement mapping as Phase 2.	Must	Approved reporting/source-table consumption is demonstrable in MVP; enterprise data warehouse replacement mapping is Phase 2.
FR-KPI-012	KPI Visibility	Support near-real-time writeback for user-created records while KPI source refresh remains daily minimum.	Must	Requirement is demonstrable in MVP with role-

				appropriate test data.
FR-KPI-013	KPI Visibility	Display branch-level KPI summaries for branch visit planning.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-KPI-014	KPI Visibility	Display employee-level KPI details for coaching and development planning within My Success Plan, scorecard and KPI modules.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-KPI-015	KPI Visibility	Provide branch, employee, month, year, and review-date filters as needed within the KPI module.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-KPI-016	KPI Visibility	Support search or selection of employee within branch context.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-KPI-017	KPI Visibility	Support performance status indicators based on existing thresholds or approved business rules.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-KPI-018	KPI Visibility	Support historical scorecard access (view previous months scorecards).	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-KPI-019	KPI Visibility	Display incentive or tier information within the employee scorecard if applicable to employee role.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-KPI-020	KPI Visibility	Prevent users from editing official KPI definitions, formulas, thresholds, or corporate targets.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-COA-001	Coaching Records	Allow management-level users and above to create coaching records for employees within authorized hierarchy..	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-COA-002	Coaching Records	Prevent non-management employees from creating coaching records.	Must	Requirement is demonstrable in MVP with role-

				appropriate test data.
FR-COA-003	Coaching Records	Capture coaching source/type/reason	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-COA-004	Coaching Records	Capture KPI focus area and/or competency focus area..	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-COA-005	Coaching Records	Capture observation summary, specific example, coaching provided, employee response, root cause, expectation clarified, training/job aid reference, and action required..	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-COA-006	Coaching Records	Allow attachment upload for coaching records.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-COA-007	Coaching Records	Allow visible-to-employee and internal-only visibility controls.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-COA-008	Coaching Records	Require employee acknowledgement, when selected, for a coaching record.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-COA-009	Coaching Records	Allow employee comments in an employee-visible discussion thread.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-COA-010	Coaching Records	Allow internal comments for manager/HR/Compliance/leadership users based on permissions.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-COA-011	Coaching Records	Make coaching records immutable after final submission.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-COA-012	Coaching Records	Allow post-submission comments, acknowledgements, task updates, and audit events without changing original record text.	Must	Requirement is demonstrable in MVP with role-

				appropriate test data.
FR-COA-013	Coaching Records	Allow tasks/action items to be created from coaching records.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-COA-014	Coaching Records	Allow follow-up meetings or reminders to be created from coaching records.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-COA-015	Coaching Records	Provide coaching record status, Due Date, owner, and task/action-item tracking. Do not use a separate Follow-Up Date for normal task creation.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-COA-016	Coaching Records	Provide coaching record search by employee, manager, branch, date, KPI, competency, type, topic, tag, keyword, and status.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-COA-017	Coaching Records	Provide coaching interaction repository with pending, overdue, and completed views.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-COA-018	Coaching Records	Provide PDF export for coaching records.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-COA-020	Coaching Records	Provide audit history of record creation, visibility, acknowledgement, comments, tasks, and exports.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-COA-021	Coaching Records	Support tags or categories for coaching records.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-COA-022	Coaching Records	Support recognition as a configurable coaching/interactions reason.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-COA-023	Coaching Records	Support configurable recognition prompts or notifications where data indicates positive performance and business rules	Must	Configurable recognition prompt behavior is demonstrable in

		are configured. AI-driven recognition automation is Phase 2.		MVP; AI automation is Phase 2.
FR-COA-024	Coaching Records	Allow access to prior coaching records from the coaching workspace.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-COA-025	Coaching Records	Show related scorecard and My Success Plan context from the coaching workspace.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-IDP-001	My Success Plan	Allow employees to create monthly My Success Plan goals during the first week of each month.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-IDP-002	My Success Plan	Allow managers to review, provide feedback, approve, or return monthly My Success Plans for refinement.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-IDP-003	My Success Plan	Prevent employee edits after My Success Plan approval.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-IDP-004	My Success Plan	Prevent general edits after approval except through a controlled correction process if later approved.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-IDP-005	My Success Plan	Support KPI development goals.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-IDP-006	My Success Plan	Support competency development goals.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-IDP-007	My Success Plan	Support strengths and opportunities for KPI focus areas.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-IDP-008	My Success Plan	Support strengths and opportunities for competency focus areas.	Must	Requirement is demonstrable in MVP with role-

				appropriate test data.
FR-IDP-009	My Success Plan	Support action plans/action steps within the My Success Plan. The allocation of action steps across selected focus areas remains subject to the unresolved JIRA design question.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-IDP-010	My Success Plan	Support what-success-looks-like/success-measure fields within the My Success Plan. The allocation of success measures across selected focus areas remains subject to the unresolved JIRA design question.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-IDP-011	My Success Plan	Support monthly summary fields such as things to continue and things to improve.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-IDP-012	My Success Plan	Provide minimum/maximum focus-area controls as business rules are finalized. Metric Focus and Competency Focus support multiple selections and support None / N/A where a plan does not include one of the categories.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-IDP-013	My Success Plan	Pull applicable competency stage from employee role/stage data and display the correct competency behaviors.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-IDP-014	My Success Plan	Store all four stages of the formal HR competency model and behaviors for all seven competencies.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-IDP-016	My Success Plan	Generate approved My Success Plan PDFs for download and manual Dayforce attachment. Automated attach/transmit to Dayforce is Phase 2.	Must	App-generated approved My Success Plan PDF is demonstrable in MVP; automated Dayforce transmission is Phase 2.
FR-IDP-017	My Success Plan	Provide historical archive of approved My Success Plans.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-IDP-018	My Success Plan	Allow HR sampling and review of My Success Plans.	Must	Requirement is demonstrable in MVP with role-appropriate test data.

FR-IDP-019	My Success Plan	Provide My Success Plan completion and approval reporting.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-IDP-020	My Success Plan	Exclude attachment functionality from My Success Plans.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-001	Branch Visit Governance	Provide Branch Visit Governance as a standalone module.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-002	Branch Visit Governance	Allow authorized users to create branch visit records.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-003	Branch Visit Governance	Support the same branch visit workflow for AVPs, VPs, SVPs, and other authorized field leaders.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-004	Branch Visit Governance	Do not enforce branch visit frequency in the system.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-005	Branch Visit Governance	Allow branch selection and display of branch snapshot information.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-006	Branch Visit Governance	Display branch staffing overview and branch KPI snapshot where data is available.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-007	Branch Visit Governance	Support manual or rules-based suggestions for branch visit planning.	Must	Manual/rules-based planning support is demonstrable in MVP; AI recommendations are Phase 2.
FR-BVG-008	Branch Visit Governance	Support branch visit prioritization using performance trends, risk indicators, and KPI exceptions.	Must	Rules/manual prioritization support is demonstrable in MVP; AI

				recommendations are Phase 2.
FR-BVG-009	Branch Visit Governance	Recommend employees requiring coaching where data indicates material need or opportunity.	Future	Phase 2 / future capability; not MVP.
FR-BVG-010	Branch Visit Governance	Display or support branch-level discussion topics based on branch performance.	Must	Rules/manual topic support is demonstrable in MVP; AI-generated topics are Phase 2.
FR-BVG-011	Branch Visit Governance	Recommend suggested follow-up actions based on identified opportunities. Solutions driven by 'Library of Solutions' table	Future	Phase 2 / future capability; not MVP.
FR-BVG-012	Branch Visit Governance	Allow users to accept suggested topics, add custom topics, or use free-form topics.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-013	Branch Visit Governance	Require discussion topics on every branch visit record.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-014	Branch Visit Governance	Require takeaways or discussion notes on every branch visit record.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-015	Branch Visit Governance	Allow action plans or assigned action items on Branch Visit records when an observation or discussion requires follow-up/action; do not require an Action Plan for every observation or mandatory discussion topic.	Must	Branch Visits can be finalized without an Action Plan when no follow-up/action is required.
FR-BVG-016	Branch Visit Governance	Allow attachments on branch visit records.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-017	Branch Visit Governance	Allow tasks to be created from branch visit records.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-018	Branch Visit Governance	Allow follow-up meetings to be scheduled from branch visit records.	Must	Requirement is demonstrable in MVP with role-appropriate test data.

FR-BVG-019	Branch Visit Governance	Allow action items to be assigned to allowed users within appropriate hierarchy.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-020	Branch Visit Governance	Finalize branch visit records into after-action reviews.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-021	Branch Visit Governance	Provide after-action review PDF export.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-022	Branch Visit Governance	Provide active and completed Branch Visit history; true archival handling remains to be defined.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-023	Branch Visit Governance	Issue notification of completed branch visit, with after-action review attachment, to management chain of branch (VP, AVP, BM)	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-024	Branch Visit Governance	Provide post-visit performance comparison for available KPI windows.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-025	Branch Visit Governance	Provide search/filter by branch, visitor, topic, date, assigned action, status, and keyword.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-026	Branch Visit Governance	Provide branch KPI snapshot views for the selected branch within visit planning module.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-027	Branch Visit Governance	Provide rolling 12-month performance history for branch-level KPI snapshot within branch visit planning module.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-028	Branch Visit Governance	Allow users to toggle between current-period KPI views and 12-month KPI trend views within branch visit planning module.	Must	Requirement is demonstrable in MVP with role-appropriate test data.

FR-BVG-029	Branch Visit Governance	Support a configurable library of recommended actions, coaching activities, development activities, and operational solutions aligned to branch visit discussion topics.	Future	Requirement is demonstrable future phase and not MVP.
FR-BVG-030	Branch Visit Governance	Allow administrators to maintain, add, modify, activate, deactivate, and categorize recommended actions within the solution library.	Future	Phase 2 / future capability; not MVP.
FR-BVG-031	Branch Visit Governance	Allow AI or rules-based planning capabilities to recommend predefined actions from the solution library based on identified branch performance conditions, KPI exceptions, discussion topics, or business rules.	Future	Requirement is demonstrable future phase and not MVP.
FR-ACC-001	Branch Visit Governance	Do not treat branch visit records as coaching records, although tasks and reporting may relate to coaching/development outcomes.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-ACC-002	Accountability Meetings	Provide Accountability Meeting Governance as a structured module.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-ACC-003	Accountability Meetings	Support weekly accountability meeting cadence.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-ACC-004	Accountability Meetings	Allow one meeting record to contain multiple participants.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-ACC-005	Accountability Meetings	Allow meetings between any manager and direct or indirect reports as permitted by hierarchy.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-ACC-006	Accountability Meetings	Support SVP-to-VP, VP-to-AVP, AVP-to-Branch Manager, Branch Manager-to-Employee, and central operations management meeting structures.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-ACC-007	Accountability Meetings	Capture meeting date and general meeting summary.	Must	Requirement is demonstrable in MVP with role-appropriate test data.

FR-ACC-008	Accountability Meetings	Capture primary themes discussed.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-ACC-009	Accountability Meetings	Capture participant-level discussion notes.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-ACC-010	Accountability Meetings	Capture participant-level focus metrics.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-ACC-011	Accountability Meetings	Capture current monthly goals or benchmarks.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-ACC-012	Accountability Meetings	Capture weekly mini goals.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-ACC-013	Accountability Meetings	Capture plan of action for each participant.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-ACC-014	Accountability Meetings	Display previous commitments for each participant.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-ACC-015	Accountability Meetings	Capture status updates against prior commitments.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-ACC-016	Accountability Meetings	Allow adding/removing participants before final save.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-ACC-017	Accountability Meetings	Allow tasks to be created from accountability meetings.	Must	Requirement is demonstrable in MVP with role-appropriate test data.

FR-ACC-018	Accountability Meetings	Provide historical accountability meeting records.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-ACC-019	Accountability Meetings	Allow hierarchical drill-down into accountability records beneath the viewer.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-ACC-020	Accountability Meetings	Provide PDF export for accountability meeting records.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-001	Accountability Meetings	Provide search/filter by participant, meeting date, KPI, goal, action item, status, and keyword.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-002	Security / Data / Reporting / Integration	Authenticate users through corporate SSO or an approved identity provider.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-003	Security / Data / Reporting / Integration	Use Active Directory and/or enterprise data warehouse hierarchy data to determine user role and reporting hierarchy.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-004	Security / Data / Reporting / Integration	Allow hierarchical visibility upward through the reporting structure.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-005	Security / Data / Reporting / Integration	Restrict branch managers to employees assigned to their own branch unless another approved access rule applies.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-006	Security / Data / Reporting / Integration	Allow AVPs, VPs, and SVPs to see records beneath their hierarchy.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-007	Security / Data / Reporting / Integration	Allow records created by higher-level leaders for an employee to be visible to that employee's direct manager if the employee is within that manager's scope.	Must	Requirement is demonstrable in MVP with role-appropriate test data.

FR-SYS-008	Security / Data / Reporting / Integration	Provide independent special access models for HR, Compliance, and system administrators.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-009	Security / Data / Reporting / Integration	Allow HR to see all coaching records, My Success Plans, branch visits, and accountability meetings where approved.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-011	Security / Data / Reporting / Integration	Allow management-level Compliance users to create coaching records if they manage employees or are otherwise authorized.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-012	Security / Data / Reporting / Integration	Store Coaching 360-created records in the approved application database for Phase 1, with downstream data warehouse availability or replacement integration as Phase 2.	Must	Application database storage is demonstrable in MVP; downstream data warehouse integration is Phase 2.
FR-SYS-013	Security / Data / Reporting / Integration	Write user-created records back in real time or near real time where possible.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-014	Security / Data / Reporting / Integration	Refresh KPI data from enterprise sources at least daily, with multiple daily refreshes preferred.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-015	Security / Data / Reporting / Integration	Integrate with Outlook/email for notification delivery.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-016	Security / Data / Reporting / Integration	Integrate with Salesforce notification pathways where possible and aligned to enterprise architecture.	Future	Phase 2; not MVP.
FR-SYS-017	Security / Data / Reporting / Integration	Integrate with Dayforce for automatic My Success Plan PDF storage after monthly approval.	Future	Phase 2; not MVP.
FR-SYS-018	Security / Data / Reporting / Integration	Support app-generated coaching record PDF export for manual Dayforce attachment or evidence handling where required.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-019	Security / Data / Reporting / Integration	Support PDF export for branch visit after-action reviews.	Must	Requirement is demonstrable in MVP with role-

				appropriate test data.
FR-SYS-021	Security / Data / Reporting / Integration	Support PDF export for accountability meetings.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-022	Security / Data / Reporting / Integration	Provide executive usage/adoption reporting.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-023	Security / Data / Reporting / Integration	Provide reporting for logins, active users, inactive users, managers not creating coaching records, and low-adoption departments/branches.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-024	Security / Data / Reporting / Integration	Provide coaching activity and completion reporting.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-025	Security / Data / Reporting / Integration	Provide task/action-item and overdue task reporting.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-026	Security / Data / Reporting / Integration	Provide My Success Plan completion and approval reporting.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-027	Security / Data / Reporting / Integration	Provide branch visit volume, completion, and follow-up action reporting.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-028	Security / Data / Reporting / Integration	Provide accountability meeting completion and participation reporting.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-029	Security / Data / Reporting / Integration	Provide audit sampling and exception reporting for HR and Compliance.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-030	Security / Data / Reporting / Integration	Provide search/export access based on role and hierarchy.	Must	Requirement is demonstrable in MVP with role-

				appropriate test data.
FR-SYS-031	Security / Data / Reporting / Integration	Log all record creation, finalization, export, acknowledgement, task, notification, and audit review events.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-032	Security / Data / Reporting / Integration	Retain records for at least seven years unless longer retention is required.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-033	Security / Data / Reporting / Integration	Support configurable reference lists for coaching reason/type, topics, tags, and accountability themes.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-034	Security / Data / Reporting / Integration	Provide data validation/error logging for integration failures.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-035	Security / Data / Reporting / Integration	Prevent unauthorized access to confidential/internal collaboration threads.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-036	Security / Data / Reporting / Integration	Support embedded deployment within Salesforce through iframe, web component, embedded application framework, or equivalent approach where permitted by enterprise security and architecture standards.	Future	Phase 2 or later; not MVP unless enterprise architecture explicitly requires it.
FR-SYS-037	Security / Data / Reporting / Integration	Restrict non-management employees to Employee Scorecard, My Success Plan, employee-visible coaching records, assigned tasks, and alerts based on permissions.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-038	Security / Data / Reporting / Integration	Restrict branch and central operations management users to modules required for their role including KPI Dashboard, Scorecard, My Success Plan, Coaching Dashboard, and applicable accountability functionality.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-039	Security / Data / Reporting / Integration	Restrict Branch Operations senior leadership users (AVP, VP, SVP, and approved equivalents) to KPI Dashboard, Scorecard, My Success Plan, Coaching Dashboard, Accountability Meetings, and Branch Visit Governance modules.	Must	Requirement is demonstrable in MVP with role-appropriate test data.

FR-SYS-040	Security / Data / Reporting / Integration	Provide executive, HR, Compliance, Legal, Audit, and approved oversight users access to organizational reporting, audit sampling, adoption analytics, usage metrics, and organizational insights based on approved permissions.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-041	Security / Data / Reporting / Integration	Support configurable role-based access control allowing modules, screens, actions, reports, exports, and administrative functions to be assigned by role without code changes.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-SYS-042	Security / Data / Reporting / Integration	Support future role additions, role modifications, and organizational structure changes through administrative configuration.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-RAA-001	Reporting & Analytics	Provide within the system, access to organizational insights including coaching activity trends, coaching completion rates, My Success Plan completion rates, branch visit activity, accountability meeting activity, adoption metrics, and user engagement metrics.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-RAA-002	Reporting & Analytics	Provide within the system usage analytics including logins, active users, inactive users, coaching record volume, task completion rates, acknowledgement completion rates, and other platform adoption measures.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-RAA-003	Reporting & Analytics	Provide within the system dashboards summarizing organizational coaching effectiveness, development activity, branch visit activity, accountability activity, and platform utilization.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-KPI-021	KPI Visibility	Allow users to filter directly by employee without first selecting a branch.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-KPI-022	KPI Visibility	Provide ascending/descending column sorting for KPI metrics, including Branch Goal.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-KPI-023	KPI Visibility	Support ACE payout and target visibility, including daily incentive calculation, projected monthly payout, and incentive thresholds where applicable.	Must	Phase to be confirmed where not already included in current scorecard scope.

FR-KPI-024	KPI Visibility	Evaluate employee-level Credit Grade 4/5 utilization as an employee scorecard metric.	Future	Phase 2 evaluation; calculation feasibility and decision to proceed remain open.
FR-IDP-021	My Success Plan	Maintain one My Success Plan per person per month while allowing multiple Metric Focus Area selections and multiple Competency Focus Area selections.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-IDP-022	My Success Plan	Remove the free-form Other option from My Success Plan focus selections.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-IDP-023	My Success Plan	Use Approved as the final non-editable My Success Plan state instead of Locked; allow comments to be added after approval.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-IDP-024	My Success Plan	Allow the manager to approve an acceptable employee-owned My Success Plan or return it to the employee for refinement.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-IDP-025	My Success Plan	Treat completion within the first seven calendar days as the expected My Success Plan operating rhythm without restricting access after seven days. Surface plans missing after day seven as exceptions and provide AVPs visibility into delinquent plans for follow-up.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-IDP-026	My Success Plan	Support date-range selection for My Success Plan reporting and review, including defined review periods such as 90-day follow-up periods.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-IDP-027	My Success Plan	For an active prior-month My Success Plan where manager review/approval did not occur, do not reopen the prior month for retroactive changes.	Must	Final month-end status/auto-approval behavior, notification recipient/content, phase, and priority remain open.
FR-ACC-021	Accountability Meetings	Make finalized Accountability Meeting records read-only and provide an alert that the meeting was finalized.	Must	Requirement is demonstrable in MVP with role-appropriate test data.

FR-ACC-022	Accountability Meetings	Support notifications for finalized Accountability Meetings.	Must	Notification audience, in-app/email delivery method, and management levels remain open.
FR-BVG-032	Branch Visit Governance	Use Branch Visit functionality for pre-visit planning before the visit, followed by action-plan and follow-up documentation after the visit.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-033	Branch Visit Governance	Provide a link to the last Branch Visit report during Branch Visit planning.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-034	Branch Visit Governance	Display an information icon for Confidential Leadership Feedback stating that the field is visible to the AVP, the AVP manager, and above, and is not visible to the Branch Manager.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-035	Branch Visit Governance	When a Branch Visit action plan item requires follow-up/action, require a task owner/assignee before finalization and preserve auditability of the owner assignment.	Must	The owner is required when a follow-up/action task is created; whether additional action-plan items require tasks remains governed by the applicable business rule.
FR-BVG-036	Branch Visit Governance	Remove the Parent label from Branch Visit task/action-item details and display the Branch Visit date.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-037	Branch Visit Governance	Allow ongoing notes/status updates on tasks/action items and reflect those updates in audit history.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-038	Branch Visit Governance	Surface existing open action items when preparing a subsequent Branch Visit while preserving association with the original Branch Visit.	Must	Phase and whether prior items can be updated/closed from the new visit context remain open.
FR-BVG-039	Branch Visit Governance	Make completed Branch Visit records read-only while allowing individual open tasks/action items to continue to be updated.	Must	Requirement is demonstrable in MVP with role-

				appropriate test data.
FR-BVG-040	Branch Visit Governance	Replace the current Archived Branch Visit status with Completed.	Must	True archival and long-term retention/access requirements remain open.
FR-BVG-041	Branch Visit Governance	Retain After-Action Review records indefinitely in the interim.	Must	Long-term retention and archive access require Legal, Compliance, and HR review.
FR-BVG-042	Branch Visit Governance	Add Year-to-Date as an available Branch Visit performance comparison/filter option.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-043	Branch Visit Governance	Remove the Branch Overview section from Branch Visit Planning.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-044	Branch Visit Governance	Support a Confidential Visit option that prevents the Branch Manager from seeing a planned/draft Branch Visit before completion/finalization. Use Confidential Visit terminology and do not use Surprise Visit terminology.	Must	Post-finalization visibility, reporting/count visibility before finalization, and audit behavior remain open.
FR-BVG-045	Branch Visit Governance	Do not differentiate Branch Visit forms by visit type.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-BVG-046	Branch Visit Governance	Provide a month-based Branch Visit planning view. Users can add branch visit placeholders to dates, select a placeholder to open the Branch Visit planning page with date/branch context, and reschedule or remove placeholders before finalization.	Must	Month-based Branch Visit planning and placeholders are required; detailed placeholder record/visibility behavior remains subject to the applicable JIRA follow-up decisions.
FR-SYS-043	Security / Data / Reporting / Integration	Do not provide Relief Managers Branch Manager-equivalent My Success Plan authority. When there is no Branch Manager, the AVP handles My Success Plan review and approval.	Must	Requirement reflects current My Success Plan authority; remaining system-role mapping is handled separately.

FR-SYS-044	Security / Data / Reporting / Integration	Send follow-up meetings scheduled from Coaching 360 to Outlook; subsequent meeting changes shall be made in Outlook.	Must	One-way Outlook calendar integration.
FR-SYS-045	Security / Data / Reporting / Integration	Provide a quick-access actionable task view showing items due today and upcoming items through a seven-day look-ahead period.	Must	Phase 1: Due Today shows tasks due on the current date; Upcoming uses a seven-day look-ahead. User-configurable look-ahead preferences are not required for Phase 1.
FR-RAA-004	Reporting & Analytics	Break out the Dashboard top summary record total by record category so it aligns with the detailed reporting sections.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-RAA-005	Reporting & Analytics	Use Engagement in place of Adoption and My Success Plan Completion in place of the prior development-plan completion label in the reporting dashboard.	Must	Requirement is demonstrable in MVP with role-appropriate test data.
FR-RAA-006	Reporting & Analytics	Support a January-to-June average component for mid-year review support.	TBD	Data availability and current-phase versus future-phase placement remain open.
FR-IDP-028	My Success Plan	Remove Current Actual, KPI Source, and Goal Statement from the Success Plan.	Must	Removed fields are not presented as Success Plan entry requirements.
FR-IDP-029	My Success Plan	Require all remaining applicable Success Plan fields.	Must	A Success Plan cannot be completed/approved with an applicable required field blank.
FR-SYS-046	Security / Data / Reporting / Integration	Use Tasks or Action Items instead of Follow-Up in user-facing navigation, pages, reports, PDF exports, validation messages, and notifications unless an approved exception applies.	Must	User-facing task terminology is consistent with the approved Tasks/Action Items terminology.
FR-SYS-047	Security / Data / Reporting / Integration	Display Created Date and Due Date for tasks/action items; normal task creation captures Due Date and does not use a separate Follow-Up Date. Task status and overdue logic use Due Date consistently.	Must	Task date display and overdue behavior use Created Date and Due Date consistently.

8. Security and Visibility Model

Security is a primary business requirement. The platform must enforce both hierarchy-based access and special access models. The design must support field and central operations structures without relying solely on specific job titles.

8.1 Hierarchy Model

Hierarchy Type	Levels / Groups	Visibility Principle
Field Operations	SVP -> VP -> AVP -> Branch Manager -> Account Representative / Field Employee	Records are visible to users in the employee's reporting hierarchy. Branch managers see only their own branch employees.
Central Operations	SVP -> VP -> AVP -> Management Employee -> General Employee, with many possible titles below AVP	Role groupings should drive permission levels because central titles vary.
Special Access	HR, Compliance, System Administrator	Access is independent of reporting hierarchy and must be explicitly granted, logged, and governed.

8.2 Security Matrix

Role	Can View	Can Do	Restriction / Notes
Production Employee	Own scorecard, own coaching records shared with employee, own My Success Plan, own tasks & alerts	Acknowledge, comment, create/edit My Success Plan goals before approval, complete tasks and view alerts	Cannot create coaching records; cannot edit submitted coaching records; cannot view others, cannot access reporting, branch visits or accountability modules
Branch Manager	Own branch employees, records created by others for own employees, branch accountability records	Create coaching records, access coaching dashboard, review/approve My Success Plans, create tasks, run accountability meetings	Cannot view employees outside branch unless hierarchy changes or special access applies.
AVP	Branches/employees in assigned hierarchy	Create coaching records, create branch visits, assign tasks, run accountability meetings, view subordinate records	Can create coaching directly for employees in scope.

VP / SVP	All subordinate hierarchy records	Create coaching/branch visit/accountability records; view adoption and activity reporting	Executive dashboards where authorized.
Central Manager	Central employees within hierarchy	Create coaching records, access coaching dashboard, review/approve My Success Plans, create tasks	Central title mappings TBD.
HR/Compliance/Admin	Enterprise or approved scope	Create coaching records, access coaching dashboard, review/approve My Success Plans, create tasks (if management level with subordinates), View/search/export/sample records; audit; review My Success Plans/coaching/branch/accountability	Creation rights only where HR user is management-level or specifically authorized.
Executive Leadership	Enterprise or approved scope	Create coaching records, access coaching dashboard, review/approve My Success Plans, create tasks, review My Success Plans/coaching/branch/accountability usage data.	
Relief Manager	Authorized branch/employee scope as defined by the Relief Manager role; My Success Plan authority is not Branch Manager-equivalent.	No Branch Manager-equivalent My Success Plan review/approval authority. When no Branch Manager is present, the AVP handles My Success Plan review and approval.	Corresponding system/Active Directory role mapping remains to be confirmed.

9. Data, Integration, and System of Record Requirements

9.1 System of Record Model

Data Domain	System of Record / Source	Coaching 360 Behavior
Employee Identity / Names	Active Directory and enterprise data warehouse	Read employee identity and profile data.
Organizational Hierarchy	Active Directory and enterprise data warehouse	Read hierarchy and role mapping for visibility and permissions.
KPI Data	Enterprise data warehouse / existing reporting data sources	Consume approved KPI outputs; do not own formulas.
Coaching Records	Created in Coaching 360; stored in application database/data warehouse	System of record for operational coaching records.
My Success Plans	Created in Coaching 360; stored in application database/data warehouse; PDF to Dayforce	System of record for operational monthly development plans; Dayforce stores PDF copy.
Annual Performance Reviews	Dayforce	Out of scope for Coaching 360.
Branch Visit Records	Created in Coaching 360; stored in application database/data warehouse	System of record for branch visit governance.
Accountability Meeting Records	Created in Coaching 360; stored in application database/data warehouse	System of record for weekly accountability records.

Notifications	Coaching 360 event source; Outlook/email Phase 1 delivery channels; Salesforce Phase 2 delivery channel if approved.	Generate in-app and Outlook/email notifications in Phase 1; route through Salesforce only in Phase 2 if approved.

9.2 Integration Requirements

Integration	MVP Requirement	Notes
Active Directory	Required	Employee identity, role grouping, and hierarchy mapping.
Enterprise Data Warehouse	Phase 1 approved source where available; replacement/downstream integration Phase 2	Use approved KPI/reporting sources for MVP. Data warehouse replacement mapping and downstream integration are Phase 2.
Dayforce	Manual handling for Phase 1; automated integration Phase 2	Approved My Success Plans generate app PDFs for download/manual attachment in Phase 1. Automated attach/transmit to Dayforce is Phase 2 after integration approval.
Outlook / Email	Required	Notifications for tasks, acknowledgements, reminders, overdue actions, and follow-ups. Follow-up meetings scheduled from Coaching 360 flow to Outlook; subsequent meeting changes are made in Outlook.
Salesforce	Phase 2 / deferred notification path	In-app and Outlook/email notifications are required for MVP. Salesforce notifications move to Phase 2 if approved by enterprise architecture.
Mariner University / Business Library	Future phase	Potential learning resource index and links by KPI/competency. Not MVP unless specifically approved.

10. Reporting, Analytics, Search, and Audit Requirements

10.1 Reporting Catalog

Report / Analytics Area	Primary Audience	Required Measures
Engagement Analytics	Executive, HR, Compliance	Logins, active users, inactive users, adoption by branch/department/role, managers not using tool.
Coaching Activity	Executive, HR, Compliance, Leadership	Records created, records by manager, records by type/reason, employee acknowledgements, pending/overdue tasks or action items.
My Success Plan Completion	Executive, HR, Leadership	Monthly My Success Plans created, manager-reviewed, approved, not completed, app PDF export/manual handling status, and Phase 2 Dayforce automation status when applicable.
Branch Visit Activity	Executive, Branch Leadership	Visits completed, visits by leader, branch visit history, actions assigned/completed, after-action reviews.

Accountability Meeting Activity	Executive, Leadership	Weekly meetings documented, participants, focus metrics, commitments, overdue actions.
Task / Action-Item Reporting	Managers, Leadership, HR	Open tasks, overdue tasks, completed tasks, tasks by parent record type and owner.
Audit Sampling	HR, Compliance	Random sample generation across coaching, My Success Plans, branch visits, accountability meetings; review status and findings.
Export / Evidence Reporting	HR, Compliance, Leadership	PDF exports, historical record retrieval, employee-specific record packages.

10.2 Search Requirements

Record Type	Search / Filter Criteria
Coaching Records	Employee, manager, branch, region, district, date, KPI, competency, coaching type/reason, discussion topic, tag, keyword, status, acknowledgement status, follow-up status.
Branch Visits	Branch, visitor, visit date, discussion topic, assigned action, owner, status, keyword, active/completed.
Accountability Meetings	Participant, facilitator, meeting date, KPI, goal, action item, status, keyword, hierarchy.
My Success Plans	Employee, manager, month, year, KPI focus, competency focus, status, approval status, completion status, and date range.
Tasks	Owner, due date, overdue status, parent record type, parent record ID, completion status, keyword.

10.3 Audit Requirements

- Log record creation, finalization, acknowledgement, comments, task creation, task updates, exports, Dayforce PDF transmission, visibility changes, and audit sample review actions.
- Provide HR random sampling across coaching records, My Success Plans, branch visits, and accountability meetings.
- Provide exportable audit evidence at employee, branch, manager, and organization levels based on role permissions.
- Preserve immutable original coaching content after submission.
- Preserve approved monthly My Success Plan records as historical, non-editable records.
- Retain all relevant records for seven years minimum unless regulatory, legal, or policy requirements require longer retention.

11. Non-Functional Requirements

ID	Category	Requirement	Priority
NFR-001	Performance	Common dashboards and primary screens should load within 2 seconds under expected business volume where technically possible.	Must
NFR-002	Availability	Target at least 99% uptime excluding planned maintenance.	Must
NFR-003	Scalability	Support enterprise deployment for 2,000-2,500 users with growth capacity.	Must
NFR-004	Security	Use secure authentication, RBAC, hierarchy permissions, and enterprise security standards.	Must

NFR-005	Auditability	Maintain complete audit trails for record events, exports, access, and changes.	Must
NFR-006	Retention	Retain records for seven years minimum unless longer retention is required.	Must
NFR-007	Accessibility	Meet current enterprise accessibility standard where possible.	Should
NFR-008	Browser Support	Support current enterprise-supported browsers	Must
NFR-009	Responsive Web	Provide usable responsive web layout; native mobile app is not required.	Should
NFR-010	Reliability	Architecture must be stable, fast, and reliable to support adoption and field usage.	Must
NFR-011	Maintainability	Vendor shall provide maintainable code, documentation, deployment model, support plan, and upgrade strategy.	Must
NFR-012	Configurability	Reference values, roles, notifications, and reporting filters should be configurable where possible.	Should
NFR-013	Data Quality	Integration failures and data anomalies should be logged and surfaced to support teams.	Must
NFR-014	Interoperability	Architecture must support Phase 1 Outlook/email notification delivery, corporate SSO or approved identity provider, governed app-generated PDF exports, and extension points for Phase 2 Dayforce, Salesforce, data warehouse, and AI integrations.	Must

12. Implementation, Transition, and UAT Requirements

12.1 Transition Requirements

ID	Transition Requirement	Acceptance / Notes
TR-001	Existing KPI scorecard data, logic, ranking structures, and history must be replicated or made available before cutover.	Validated by Operations, MIS, BA&R, and pilot users.
TR-002	Historical scorecards and rankings must remain readable and exportable.	Archive design TBD.
TR-003	Old spreadsheet/RPA/email/Power BI-only workflows may run in parallel until validation is complete.	Parallel run duration TBD.
TR-004	Users require training materials for coaching records, My Success Plans, branch visits, accountability meetings, tasks, notifications, and exports.	Training required before production release.
	Policy and procedures must be drafted to properly govern the use of the new system	Policy required before production release.
TR-005	Pilot should include central and branch operations users before enterprise rollout.	Pilot population TBD.
TR-006	Competency stage/behavior content must be loaded before My Success Plan and competency coaching UAT.	Pending HR deliverable.
TR-007	Data dictionary and integration mappings must be finalized before development build completion.	Pending technical/business deliverable.

12.2 UAT Strategy

- Validate role-based access for employee, branch manager, AVP, VP, SVP, central manager, HR, Compliance, and administrator roles.

- Validate KPI drill-down, scorecard history, review exclusion, scorecard export, and navigation to related modules.
- Validate creation, submission, immutability, acknowledgement, comments, attachments, follow-up tasks, and search for coaching records.
- Validate monthly My Success Plan workflow from employee goal entry to manager approval, Approved status, archive, and app-generated PDF export/manual handling. Automated Dayforce transmission is Phase 2 validation.
- Validate branch visit planning, AI/rules suggestions, custom topics, takeaways, action plans, task assignment, after-action review, archive, post-visit comparison, and export.
- Validate accountability meetings with multiple participants, previous commitments, mini goals, plans, history, search, and export.
- Validate notifications through in-app and Outlook/email pathways for Phase 1. Validate Salesforce notification delivery only when the Phase 2 integration is approved and available.
- Validate audit sampling and reporting for HR/Compliance.
- Validate data writeback and refresh behavior with enterprise data warehouse.

• UAT tester role levels beyond AVPs remain to be confirmed; AVPs and SVPs were identified as expected participants in the August 18 pilot notes.

• Validate finalized Accountability Meetings become read-only and confirm finalized-meeting alert behavior.

• Validate Branch Visit confidential-visit visibility, pre-visit planning, mandatory follow-up ownership, prior open action-item visibility, Completed status, read-only completed records, Year-to-Date comparison, and follow-up task detail changes.

• Validate My Success Plan multi-select focus areas, employee ownership, manager approval/return-for-refinement workflow, Approved status, date-range reporting, and first-seven-calendar-day operating rhythm.

• Validate direct employee filtering and KPI column sorting, including Branch Goal.

13. Risks, Assumptions, Constraints, Dependencies, and Open Items

13.1 Risks

Risk	Impact	Mitigation
Scope size of MVP	Large MVP may affect cost, timeline, and delivery complexity.	Use capability-based prioritization, vendor estimation, and phased delivery within MVP where necessary.
Vendor underestimation	Coaching 360 is broader than a simple coaching app.	Provide this BRD, prototype, data dictionary, process walkthroughs, and vendor Q&A.
Phase 2 integration complexity	Dayforce, Salesforce, enterprise data warehouse replacement, and AI integrations may require multiple teams beyond the Phase 1 app/email/manual-export baseline.	Define integration owners and technical interface requirements before Phase 2 delivery.

Competency framework incomplete	My Success Plan and competency coaching cannot be fully implemented without all stages/behaviors.	HR to provide competency model for all seven competencies and four stages.
Adoption risk	Managers may resist new documentation requirements.	Keep workflows simple, provide training, and report adoption transparently.
Phase 2 AI feasibility risk	AI branch visit recommendations may require data science/AI readiness beyond initial Phase 1 build.	Design AI as a Phase 2 capability with rules-based/manual fallback and human override.
Security misconfiguration	Improper hierarchy/security could expose sensitive coaching records.	Perform security design review, role testing, and audit logging validation.
Dayforce integration uncertainty	Automatic My Success Plan PDF transmission depends on Dayforce API/process constraints and is Phase 2.	Use app-generated PDF/manual handling in Phase 1; confirm automated integration method during Phase 2 technical design.
Hidden Usage Costs	Integration with AI and external systems may create costs that outweigh the benefit of their application.	Confirm costs for Phase 2 AI, Salesforce, Dayforce, and data warehouse integration before approval.

13.2 Assumptions

- Existing KPI formulas, thresholds, rankings, and scorecard structures are known by internal data/reporting teams and will be provided to vendors as a separate data dictionary.
- Active Directory and enterprise data warehouse contain sufficient employee identity and hierarchy data to support role-based visibility.
- Central operations role mapping will be grouped by senior management, management, and general employee rather than relying on every title.
- Dayforce will remain the annual performance review system and HR document repository, while Coaching 360 manages operational coaching/development records and Phase 1 manual PDF export handling until automated Dayforce storage is approved for Phase 2.
- The vendor will recommend architecture rather than the BRD prescribing .NET, SQL Server, cloud, on-prem, or hosted model.

13.3 Open Items

Open Item	Owner	Needed For
My Success Plan focus-area detail design	Business / Development	Confirm only the portions still unresolved in JIRA. Metric/Competency multi-select and overall-plan Strengths/Opportunities are established; do not reopen those decisions.
Key drivers / learning resources	Business / Operations	Confirm whether key drivers, suggested actions, and learning resources based on selected metrics/competencies move to Phase 2 with requirements gathered before development.

September UAT communication	Project / Operations	Confirm participant messaging, expectations, and testing responsibilities for September UAT.
Operational readiness coordination	Operations Leadership	Confirm who owns/coordinates operational readiness outside training and whether Joanne will project manage the operational readiness effort.

14. Appendices

These appendices are not complete. This document is merely outlining the currently known inventory.

Appendix A - Initial KPI Inventory Draft

KPI	Description / Notes
LPE	Loan per Employee; existing definition and formula governed externally.
District LPE	Loan Per Employee at District view level
Branch LPE	Loan Per Employee at Branch Level
NMPH	New Money Per Hour; existing definition and formula governed externally.
Contacts per Worked Hour	Productivity metric from existing scorecard.
Production %	Production attainment metric.
App Rate	Application conversion rate.
Funded Rate	Funding conversion rate.
Average Cashout	Average cash disbursed.
First Lien Rate / First Lien %	First lien production percentage.
Payment Rate	Payment performance metric.
NMC	Net Margin Contribution.
Current Month DLQ %	Current delinquency performance.
30-89 DLQ %	Delinquency performance metric.
ROA %	Return on assets.
Non-Affiliated Applications Per Approved Headcount	Staffing-adjusted productivity.
DARP Deals Booked	DARP production metric.
PB Renewal %	Renewal performance metric.
Conversion Combo	Combined conversion metric.
Cash Advance	Cash advance production metric.
GRIDS 4/5	Branch performance metric.
DACC	Product-specific performance metric.
Loan Pipeline	Pipeline production metric.
Relationship Penetration	Relationship growth metric.
Core Deposits	Deposit growth metric.
Expense Ratio	Expense management metric.
Turnover %	

KPI formulas, source fields, thresholds, owners, refresh logic, and data lineage must be provided in a separate technical/data dictionary before final design and development.

Appendix B - Competency Framework Placeholder

The platform shall store all four stages and associated behaviors for the seven formal HR competencies. Stage assignment shall be based on role/employee classification data. The full content must be supplied by HR before build/UAT. The seven confirmed competencies are:

- Drive Results
- Communicates Effectively
- Cultivates Innovation
- Develops Talent
- Decision Quality
- Collaborates
- Action Oriented

Appendix C - Source Materials Used

Source Material	Use in BRD
Performance Management 360 BRD v2.0.0	Baseline business problem, scope, drivers, current-state process, functional/non-functional requirements, retention, scorecards, My Success Plans, coaching, audit.
Performance Management Initial Meeting Minutes	Original catalyst, vision, scope, business drivers, stakeholder discussion.
Coaching 360 Requirements Session Transcript	My Success Plan, KPI requirements, My Success Plan structure, strengths/opportunities, branch visit feedback, accountability meeting concepts, pilot considerations.
Branch Visit Governance Transcript	Branch visit governance, AI planning concept, action assignment, post-visit reporting, archive, leadership visibility.
Coaching 360 Review Transcript	Leadership operating model, branch visit strategy, AI roadmap, learning-resource future phase, adoption and architecture considerations.
Coaching360 Final HTML Prototype	Reverse-engineered functionality including modules, navigation, KPI drill-down, coaching record workflow, coaching repository, My Success Plan, branch visits, after-action reviews, accountability meetings, tasks, alerts, exports, and security concepts.
Stakeholder Discovery in Chat	Final decisions for scope, MVP, hierarchy, retention, attachments, notifications, AI scope, Dayforce/export behavior, tasks, reporting, and security.
August 12, 2026 AVP Pilot Review	My Success Plan multi-select structure, employee ownership, Approved status, date-range reporting, seven-day operating rhythm, prior-month handling, relief manager access, scorecard requests, and open items.
August 17, 2026 AVP Pilot Review	Competency Guide, Accountability Meeting finalization, Branch Visit pre-planning, confidential leadership feedback, mandatory follow-ups, task details, Outlook meetings, prior action items, Completed status, YTD comparison, and retention/open items.
August 18, 2026 AVP Pilot Review	Reporting dashboard changes, employee filtering, KPI sorting, Branch Visit Planning changes, confidential visits, calendar planning concept, UAT participation, and open items.
August 21, 2026 Action Required Email	Outstanding UAT/operational readiness decisions and detailed open questions for My Success Plans, notifications, Branch Visits, follow-ups/tasks, and employee-level Credit Grade 4/5 utilization.

Appendix D - Glossary

Term	Definition

BRD	Business Requirements Document.
MVP	Minimum Viable Product; for this effort includes all six major Coaching 360 capabilities.
My Success Plan	Monthly employee development plan within Coaching 360 that supports metric and competency focus areas, strengths/opportunities, action steps, success measures, manager review, and Approved historical status.
KPI	Key Performance Indicator.
AVP / VP / SVP	Leadership roles in field/central operations hierarchy.
BM	Branch Manager.
AR	Account Representative.
SSO	Single Sign-On.
BOR	Branch Operations Review; not replaced by MVP.
AAR	After-Action Review for branch visits.
RBAC	Role-Based Access Control.
Data Warehouse	Enterprise data storage/reporting environment used for KPI and Coaching 360 data availability.

15. RACI and Governance Model

The following RACI model is a business-level governance view intended to guide vendor discovery, implementation planning, approval workflows, and UAT ownership. Final named resources should be confirmed during project initiation.

Activity / Deliverable	Executive Sponsor	Product Owner / Ops	Branch Ops	Central Ops	HR	Compliance	IT / Security	Data / MIS	Vendor
Approve product vision	A	R	C	C	C	C	C	C	I
Approve MVP scope	A	R	C	C	C	C	C	C	I
Define KPI data dictionary	I	C	C	C	I	I	C	A/R	C
Define competency framework	I	C	C	C	A/R	C	I	I	C
Define role/security matrix	C	R	C	C	A/C	C	A/R	C	C
Approve business rules	A	R	C	C	C	C	C	C	C
Design technical architecture	I	C	I	I	I	C	A/R	C	R
Build application	I	C	I	I	I	I	C	C	A/R
Validate KPI module	I	R	A/C	A/C	I	I	C	A/R	C
Validate coaching module	I	A/R	C	C	C	C	C	I	C
Validate My Success Plan module	I	R	C	C	A/C	C	C	I	C

Validate branch visits	I	R	A/C	I	I	C	C	C	C
Validate accountability meetings	I	R	C	C	I	I	C	I	C
Validate integrations	I	C	I	I	C	C	A/R	A/R	C
Perform UAT signoff	A	R	C	C	C	C	C	C	C
Go-live approval	A	R	C	C	C	C	A/C	C	I

Legend: R = Responsible, A = Accountable, C = Consulted, I = Informed. Where A/R appears, the same group may own both accountability and execution for that deliverable.

16. Business Process Flows

16.1 KPI Review and Coaching Launch Flow

- User authenticates through SSO and enters Coaching 360.
- User selects KPI workspace and filters hierarchy by division, region, district, branch, and employee as permitted.
- System displays approved KPI outputs from enterprise data sources without recalculating formulas.
- User reviews scorecard, trends, rankings, rolling twelve-month view, and ninety-day average where applicable.
- User identifies strength, opportunity, coaching need, or development focus.
- User navigates directly to scorecard, coaching record creation, My Success Plan, or coaching interactions for the selected employee.
- System preserves navigation context and security scope.

16.2 Coaching Record Flow

- Management-level user selects an employee within authorized hierarchy.
- User opens Coaching Record workflow and enters reason/type, focus area, KPI or competency reference, severity, observation, coaching provided, action required, owner, due date, visibility, and follow-up details.
- User attaches supporting files when applicable.
- User determines employee visibility and acknowledgement requirement.
- User submits record.
- System saves original record as immutable, assigns tasks if applicable, sends notifications, and records audit events.
- Employee views record if shared, acknowledges if required, and may comment in the thread.
- Managers and authorized users review task/action-item status through the coaching repository and task views.

16.3 Monthly My Success Plan Flow

- During the first week of the month, employee opens monthly My Success Plan workspace.
- Employee enters KPI goals, competency goals, strengths, opportunities, action plans, and success measures.
- System displays role/stage-appropriate competency behaviors from the HR model.
- Manager reviews employee-entered plan during the first week.
- Manager modifies goals if necessary and approves the monthly My Success Plan.
- System sets the My Success Plan to Approved, prevents further normal edits, archives the plan, and generates an app PDF for download/manual Dayforce attachment. Automated Dayforce send/attach behavior is Phase 2.
- Completion and approval status become available for reporting and HR audit sampling.

16.4 Branch Visit Flow

- Authorized leader opens Branch Visit module and selects a branch.
- System displays branch snapshot, staffing view, KPI data, previous visits, and AI/rules-based suggested planning items where available.
- System recommends branches, employees, discussion topics, and follow-up actions when AI capability is enabled.
- User selects suggested topics, adds custom/free-form topics, and conducts visit.
- User documents discussion notes, takeaways, and action plans.
- User assigns tasks or follow-up meetings to permitted owners.
- User finalizes visit record.
- System creates after-action review, saves history, triggers notifications, supports PDF export, and enables post-visit metric review.

16.5 Accountability Meeting Flow

- Authorized manager opens Accountability Meeting module for the weekly cadence.
- User selects or adds participants within permissible scope.
- User enters general meeting summary and themes.
- For each participant, user documents discussion notes, focus metrics, monthly goals, weekly mini goals, plan of action, previous commitments, and status updates.
- User saves or finalizes the meeting record.
- System stores historical record, creates tasks where needed, sends notifications, and supports PDF export.
- Leaders within the hierarchy can review accountability records and follow-up status.

16.6 Audit Sampling Flow

- HR or Compliance user accesses audit/sampling workspace.
- User selects record type, date range, organization scope, and sample size.
- System produces random sample of coaching records, My Success Plans, branch visits, or accountability meetings according to permissions.
- User reviews sampled records, attachments, comments, acknowledgements, tasks, and audit history.
- User records review status, findings, exceptions, or follow-up needs.
- System retains audit activity and supports export for evidence.

16.7 Task and Notification Flow

- User creates task from coaching record, branch visit, or accountability meeting.
- System records parent object, owner, due date, description, source, and status.
- System notifies the owner through in-app notification and Outlook/email for Phase 1. Salesforce notification delivery is Phase 2 where approved.
- Owner completes task or provides status update.
- System records completion event, timestamp, and comments.
- Originating manager and authorized hierarchy can view task status and overdue exceptions.

17. Representative User Stories and Acceptance Criteria

The following user stories translate major capabilities into testable business outcomes. Detailed sprint-level stories should be decomposed during implementation planning.

ID	User Story	Acceptance Criteria
US-001	As a manager, I want to view my employee's KPI scorecard from the same platform where I document coaching so that coaching is tied to current performance context.	Given I am authorized for an employee, when I select that employee from the KPI dashboard, then I can view scorecard history and navigate to coaching or My Success Plan records.
US-002	As a manager, I want to create a coaching record that becomes immutable after submission so that coaching documentation is reliable and auditable.	Given I submit a coaching record, when it is finalized, then the original content cannot be edited by standard users.
US-003	As an employee, I want to acknowledge a shared coaching record so that my manager knows I received and reviewed the coaching.	Given a coaching record requires acknowledgement, when I acknowledge it, then the system records my acknowledgement with timestamp and user ID.
US-004	As an employee, I want to create monthly My Success Plan goals during the first week of the month so that I can participate in my own development planning.	Given the monthly My Success Plan window is open, when I enter goals and save, then my manager can review and modify before approval.
US-005	As a manager, I want to approve the monthly My Success Plan after review so that the approved plan becomes the official historical record.	Given I approve the My Success Plan, when it reaches Approved status, then the employee cannot edit it and the system generates an app PDF for download/manual Dayforce attachment. Automated Dayforce transmission is Phase 2.
US-006	As an AVP, I want to document a branch visit in a standard structure so that visits are consistent and actionable.	Given I create a branch visit, when I finalize it, then it contains required discussion topics and takeaways/discussion notes; action plans and owners are included only when follow-up/action is needed.
US-007	As a branch leader, I want branch visit follow-up actions to become tasks so that assigned owners can track and complete them.	Given an action item is created, when the visit is finalized, then the task includes the required owner and due date and generates the applicable notification.
US-008	As a VP, I want to review branch visit after-action reports so that I can understand visit outcomes and performance movement.	Given a completed branch visit, when I open its report, then I can see visit details, actions, and available post-visit KPI comparisons.

US-009	As a leader, I want to document weekly accountability meetings with multiple participants so that commitments are not overwritten or lost.	Given I create a weekly meeting record, when I save it, then each participant's notes, goals, plan, commitments, and status are retained historically.
US-010	As HR, I want to randomly sample coaching, My Success Plan, branch visit, and accountability records so that I can audit documentation quality and compliance.	Given I select sample criteria, when I generate a sample, then the system returns records I am authorized to audit.
US-011	As an executive, I want usage and adoption analytics so that I can see whether leaders are using Coaching 360 consistently.	Given I have executive permissions, when I open reporting, then I can see active users, inactive users, coaching activity, My Success Plan completion, branch visits, accountability meetings, and overdue tasks.
US-012	As a manager, I want recognition prompts when employees exceed performance thresholds so that I can reinforce positive behaviors.	Given recognition rules are configured, when an employee meets a trigger condition, then the system generates a notification prompt for the manager.
US-013	As a Compliance leader, I want approved special access to records so that I can review quality or compliance-related documentation.	Given I have special access, when I search records, then I can view permitted records regardless of direct hierarchy.
US-014	As a system administrator, I want to manage role mappings and reference lists so that the platform can adapt to organizational changes.	Given I have admin permission, when I update configuration, then changes are logged and applied according to governance.
US-015	As a future-phase branch visit user, I want AI to recommend branches, employees, discussion topics, and follow-up actions so that visit planning is data-driven but still under my control.	Given Phase 2 AI planning is enabled, when I plan a visit, then suggested items appear and I can accept, modify, reject, or add my own.

18. Data Entity Catalog

The following entity catalog provides a vendor-level data model starting point. It is not a physical data model. Final attributes, keys, relationships, retention, lineage, and security classification must be completed during solution design.

Entity	Representative Attributes	Primary Source / Owner	Notes
Employee	Employee ID, name, title, role group, branch, department, manager, hierarchy path, status, competency stage.	Active Directory / Data Warehouse	Read-only in Coaching 360.
KPI Scorecard	Employee/branch ID, period, KPI, actual, goal, difference, rank, trend, status, exclusion flag.	Data Warehouse	Calculated externally; displayed in Coaching 360.
Coaching Record	Record ID, employee, creator, date/time, reason/type, KPI, competency, observation, coaching provided, action, visibility, status.	Coaching 360	Immutable after submission.

Coaching Comment	Comment ID, parent record, author, audience, timestamp, text.	Coaching 360	Append-only; visibility controlled.
Attachment	Attachment ID, parent record, filename, type, size, uploaded by, timestamp.	Coaching 360 / Storage	Allowed for coaching, branch visits, accountability.
My Success Plan	My Success Plan ID, employee, manager, month, status, KPI goals, competency goals, strengths, opportunities, actions, success measures, approval date.	Coaching 360	PDF generated in Coaching 360 for manual Dayforce handling in Phase 1; automated Dayforce export is Phase 2.
Competency Model	Competency, stage, behavior number, behavior text, effective date.	HR / Coaching 360 reference data	Four stages and seven competencies required.
Branch Visit	Visit ID, branch, visitor, date, topics, notes, takeaways, action plans, status, archive flag.	Coaching 360	Standalone module.
After-Action Review	AAR ID, visit ID, summary, actions, KPI snapshot, comparison window, export status.	Coaching 360	Generated from finalized branch visit.
Accountability Meeting	Meeting ID, facilitator, date, participants, themes, summary, status.	Coaching 360	Weekly cadence.
Accountability Participant Record	Participant record ID, meeting ID, participant, metrics, mini goals, plan, previous commitments, status update.	Coaching 360	One meeting may have many participant records.
Task	Task ID, parent type, parent ID, owner, subject, due date, status, completion date, comments.	Coaching 360	Cannot be standalone.
Notification	Notification ID, recipient, channel, event type, status, timestamp, parent object.	Coaching 360 / Outlook / Email; Salesforce Phase 2	In-app and email/Outlook for Phase 1; Salesforce notification delivery is Phase 2.
Audit Event	Event ID, actor, action, object type, object ID, timestamp, details.	Coaching 360	Retain with parent record retention.

19. Requirements Traceability Matrix

Objective	Business Need	Capability	Business Requirements	Functional Requirements
OBJ-001	Replace fragmented performance process	KPI Visibility; Coaching Repository	BR-001, BR-003, BR-004	FR-KPI-001 through FR-KPI-020

OBJ-002	Single interface for scorecards, coaching, My Success Plans, comments, tasks	KPI; Coaching; My Success Plan; Tasks	BR-006, BR-007, BR-014, BR-022	FR-KPI, FR-COA, FR-IDP, FR-SYS
OBJ-003	Standardize monthly My Success Plan creation, review, approval, archive, and app-generated PDF export with manual Dayforce handling in Phase 1; automate Dayforce storage/transmission in Phase 2.	Monthly My Success Plan completion rate; My Success Plan approval completion rate; app PDF generation/export success rate; Phase 2 Dayforce automation success rate when approved.	BR-008, BR-009	FR-IDP-001 through FR-IDP-020; FR-SYS-018; Phase 2 FR-SYS-017
OBJ-004	Branch visit governance	Branch Visit Governance	BR-010, BR-011, BR-012, BR-021	FR-BVG-001 through FR-BVG-025, excluding Phase 2 AI-only capabilities where noted
OBJ-005	Weekly accountability records	Accountability Meetings	BR-013, BR-014	FR-ACC-001 through FR-ACC-020
OBJ-006	Audit sampling and retention	Audit, Compliance, Reporting	BR-016, BR-017, BR-018	FR-SYS-027 through FR-SYS-031
OBJ-007	Executive adoption reporting	Reporting and Analytics	BR-019	FR-SYS-021 through FR-SYS-028
OBJ-008	Phase 2 AI branch planning readiness	Phase 2 AI-Assisted Branch Visit Planning	BR-020	Phase 2 AI-specific FR-BVG requirements where noted

20. Version 2.2 Changes, New Requirements, and Open Questions

Version 2.2 incorporates confirmed requirements and unresolved decisions from the August 12, August 17, and August 18 AVP pilot reviews and the August 21 action-required email. Items are not assigned to a phase unless the source material explicitly establishes the phase; otherwise the phase is identified as TBD/open.

Functional Area	Change / New Requirement	Phase	Source / Status
Performance / KPI	Direct employee filtering; KPI column sorting including Branch Goal; ACE payout/target capability; employee-level Credit Grade 4/5 evaluation.	MVP for confirmed UI changes; Credit Grade 4/5 Phase 2 evaluation; ACE phase TBD	Aug. 12 / Aug. 18; Credit Grade 4/5 remains open.
My Success Plans	One plan per employee; multi-select Metric and Competency focus; remove Other; employee-owned	Phase not separately stated in	Aug. 12 confirmed decisions.

	workflow; Approved final status; date-range reporting; first-seven-day operating rhythm.	meeting notes; confirmed changes	
My Success Plans	Prior-month handling, seven-day alerts, per-focus Strength/Opportunity/Action/Success design, Jan-Jun average, naming, key drivers/resources.	TBD / Phase question where noted	Open decisions from Aug. 12 and Aug. 21 email.
Accountability Meetings	Finalized records read-only with finalization alert.	Phase not separately stated	Aug. 17 confirmed.
Accountability Meetings	Finalization notification audience and delivery rules.	TBD	Open in Aug. 17 and Aug. 21 email.
Branch Visits	Pre-visit planning; last report link; confidential leadership feedback visibility; mandatory follow-up ownership; task detail changes; prior open action items; completed/read-only behavior; YTD; remove Branch Overview; confidential visit option; no visit types.	Confirmed changes; specific phase not separately stated	Aug. 17 / Aug. 18.
Branch Visits	Priority score, final planning layout, calendar planning view, confidential-visit reporting/audit, prior-task interaction, daily branch documentation expectations, long-term archive/retention.	TBD / open	Aug. 17 / Aug. 18 / Aug. 21 email.
Tasks / Follow-Ups	Quick-access actionable follow-up view concept and task notification rules.	TBD	Detailed behavior and phase remain open in Aug. 21 email.
Outlook	Follow-up meetings created in Coaching 360 flow to Outlook; subsequent changes occur in Outlook.	Phase not separately stated	Aug. 17 confirmed.
Reporting	Dashboard totals split by record category; Adoption renamed Engagement; My Success Plan Completion renamed My Success Plan Completion.	Phase not separately stated	Aug. 18 confirmed.
Access	Relief Managers do not have Branch Manager-equivalent My Success Plan authority; AVP handles My Success Plan review/approval when no Branch Manager is present.	Phase not separately stated	Updated to align Relief Manager My Success Plan authority; system/AD role mapping remains open.
UAT / Readiness	Tester role levels, September UAT messaging, operational-readiness coordination, and Joanne ownership confirmation.	N/A - readiness decisions	Aug. 21 email open questions.

21. Version 2.3 Changes and JIRA Alignment

Version 2.3 aligns the BRD to requirement changes documented in current JIRA tickets through August 27, 2026. JIRA ticket requirements are treated as the controlling facts for BRD alignment; JIRA comments are retained as follow-up context/questions and are not used to silently override ticket requirements. Existing Version 2.2 highlighting remains in place, and all Version 2.3 additions/changes are highlighted in yellow.

Functional Area	Change / New Requirement	Phase	Source / Status
Performance / KPI	Direct employee filtering and sortable KPI result columns remain required. YTD/January-to-June KPI context remains required where applicable, with the exact period still requiring follow-up where JIRA leaves it unresolved.	Phase 1 / Phase 1B where labeled	COACH-170, COACH-171, COACH-176
Success Plans	One plan per person/month with multi-select Metric and Competency focus; None/N/A supported; Other removed. Remove Current Actual, KPI Source, and Goal Statement. Require all remaining applicable Success Plan fields. Plans missing after seven days remain accessible and are surfaced as exceptions with AVP visibility.	Phase 1 where established	COACH-174, COACH-177, COACH-227
Success Plan Reporting	Support date-range reporting/export; the date field driving the range remains follow-up context where not established by the ticket.	Current phase	COACH-175
Relief Manager Access	Relief Managers do not receive Branch Manager-equivalent My Success Plan authority. When no Branch Manager is present, the AVP handles review/approval. Remaining system-role	Phase 1 / current requirement	COACH-179

	mapping details remain open.		
Branch Visits	Link to the most recent prior visit report; support Confidential Visit behavior/terminology; provide month-based planning with date/branch placeholders; Action Plans are optional and are not required for every observation or mandatory topic.	Phase 1 / Phase 1B where labeled	COACH-181, COACH-183, COACH-185, COACH-233, COACH-235, COACH-243
Tasks / Action Items	Use Tasks or Action Items instead of Follow-Up in user-facing functionality unless approved otherwise. Use Created Date and Due Date; normal task creation does not use a separate Follow-Up Date. Quick-access view shows Due Today and Upcoming through seven days.	Phase 1	COACH-187, COACH-196, COACH-234
Branch Visit Task Ownership	When an action-plan item requires follow-up/action, require an owner/assignee before finalization; Action Plans themselves remain optional.	Current phase	COACH-190, COACH-235, COACH-243

21.1 Open Questions / Decisions Required

Remaining unresolved items are maintained in Section 13.3 only where the JIRA ticket itself does not establish the requirement. Comments are treated as follow-up context/questions and do not independently override the ticket requirement.

22. Version 2.3 Removed / Changed Requirements and Terminology

Version 2.3 records terminology and requirement changes made across the BRD. This section identifies items that were removed or changed so the prior wording and the current requirement are visible in one place. Existing Version 2.2 and Version 2.3 yellow highlighting remains in place; all Version 2.3 changes are also highlighted in yellow.

Area	Change Type	Previous BRD Wording / State	Version 2.3 Requirement / State	Source / Notes

Terminology - Development Plan	CHANGED	Individual Development Plan / IDP / Coaching Plan	My Success Plan	Confirmed naming change. Applied throughout the BRD where the terms referred to the Coaching 360 feature.
Reporting Terminology	CHANGED	My Coaching Plan Completion / IDP Completion	My Success Plan Completion	Reporting labels updated to use the current feature name.
Success Plan Fields	REMOVED / CHANGED	Current Actual, KPI Source, and Goal Statement included as Success Plan fields	Current Actual, KPI Source, and Goal Statement are removed; all remaining applicable My Success Plan fields are required.	COACH-227
Branch Visit Action Plans	CHANGED	Action plans/action items required on every Branch Visit	Action Plans are optional and are required only when follow-up is warranted; a mandatory discussion topic does not require an Action Plan to finalize the visit.	COACH-235 / COACH-243
Branch Visit Follow-Up Tasks	CHANGED	Mandatory follow-up task/owner for mandatory Branch Visit action-plan items	Branch Visit follow-up tasks are optional in Phase 1 and are created when follow-up is needed.	COACH-190
Branch Visit Monthly Planning	CHANGED	Calendar/monthly planning view remained an evaluation/open design item	Month-based Branch Visit planning with planned date/branch placeholders is a current requirement; planned items link into the Branch Visit workflow.	COACH-185 / COACH-233
Task / Follow-Up Behavior	CHANGED	Follow-up terminology and open/TBD quick-access behavior	Use Tasks/Action Items for actionable work; provide a Phase 1 Upcoming view	COACH-196 / COACH-234

			with a seven-day look-ahead and simplified task date handling where established by JIRA.	
Seven-Day My Success Plan Handling	CHANGED	Seven-day behavior and exception visibility were partially open	My Success Plans remain accessible after day seven; missing plans are surfaced as exceptions and delinquent-plan visibility is provided as established in JIRA.	COACH-177
Relief Manager Authority	CHANGED	Relief Managers stated to have the same Coaching 360 access as Branch Managers	Relief Managers do not have Branch Manager-equivalent My Success Plan authority; when no Branch Manager is present, the AVP handles My Success Plan review/approval. Remaining system-role mapping is separate.	COACH-179

22. Version 2.5 Peer Review Corrections

Version 2.5 corrects internal inconsistencies identified during peer review. All Version 2.5 corrections are highlighted in red; prior yellow highlighting is retained.

Area	Correction Type	Previous / Inconsistent State	Version 2.5 Current State
Relief Manager Access	CHANGED	BRD contained conflicting statements that Relief Manager My Success Plan authority was unresolved while other sections granted Branch Manager-equivalent access.	Relief Managers do not have Branch Manager-equivalent My Success Plan authority. When no Branch Manager is present, the AVP handles My Success Plan review/approval. System-role mapping remains a separate open item.

My Success Plan Status	CHANGED	Approved was defined as final status, while other sections still used lock/locked as the workflow state.	Approved is the final non-editable My Success Plan state. Workflow, reporting, PDF, process-flow, and entity references use approval/Approved rather than lock/locked.
My Success Plan Terminology	CHANGED	Residual Coaching Plan/IDP feature references and terminology-replacement artifacts remained.	Current Coaching 360 feature references use My Success Plan; traceability identifiers such as FR-IDP remain unchanged.
My Success Plan Fields	REMOVED / CONFIRMED	Goal Statement, Current Actual, and KPI Source Goal appeared in prior plan requirements or implementation artifacts.	These fields are removed from My Success Plan entry/display requirements; all remaining applicable fields are required.
Task / Action-Item Dates	CHANGED	Some requirements still referenced a separate Follow-Up Date.	Tasks/action items use Created Date and Due Date. Normal task creation does not use a separate Follow-Up Date; Due Date drives overdue/status behavior.
Terminology Artifacts	CHANGED	Duplicate My Success Plan/My Success Plan and obsolete replacement wording remained.	Removed duplicate replacement artifacts and corrected the reporting-label requirement.
Task / Action-Item Terminology	CHANGED	Some task-object references still used Follow-Up terminology.	Task-object references use Tasks/Action Items where they refer to the actionable task feature; follow-up remains only where it describes a meeting/action concept.
Branch Visit User Story	CHANGED	US-006 implied every finalized Branch Visit required an Action Plan and owner.	US-006 now reflects that discussion topics and takeaways are required, while Action Plans/owners are included only when follow-up/action is needed.
My Success Plan Open Design	CHANGED	FR-IDP-009/010 asserted per-focus Action Steps and Success Measures	Requirements retain Action Steps and Success Measures without asserting per-

		although JIRA leaves that allocation unresolved.	focus allocation; the unresolved allocation remains a JIRA follow-up question.
